

62  
[1958]  
Due to our limited number of Crath Carpathian English (or Persian) Walnut nursery trees, we are not issuing a new catalogue this year.

The trees we now have, are of the same original stock that we sold for the Rev. Paul C. Crath of Canada from 1937 to 1943 when his supply of seed nuts was cut off by the Iron Curtain. Many of these seedlings have now come into bearing and have been under our close observation in central and western New York for several years. We have taken our grafts and seed nuts from the very best of these considering good bearing, hardiness and the size and quality of the nuts. It is our observation that these English walnuts from selected stock come more nearly true from seed than is the case with fruit trees.

While a considerable proportion of these trees are self-pollinating, better crops are assured if more than one tree is planted.

We have never had much success in transplanting large walnut trees. In our experience the younger trees stand transplanting better and are likely to overtake and pass the larger ones set at the same time. One year we transplanted six hundred with a loss of only eight.

We have a limited supply of filberts.

These are from an original hybrid, selected for resistance to filbert blight as well as hardiness, size and flavor of kernel. This hybrid is a result of many years of crossing and a final selection from more than a thousand trees.

Shipments made either by express or parcel post F. O. B., Ithaca, New York.

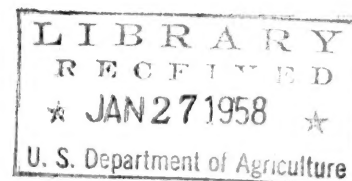

Trees are 2-3 years old and 18 to 24 inches in height.  
Filberts are 2-3 years and 18 to 24 inches in height.

Crath seedling trees - \$ 3.00 each  
Filbert seedlings - 1.50 each (plant two for  
pollination)

Terms - Cash with order or, if desired, orders will be booked for 10%--balance to be paid before the trees are shipped.  
Planting instructions accompany each shipment.

From the first meeting members of the Committee have been working on the following matters:

1. The first of these is the question of the Committee's name. It is suggested that the name should be "The Committee on the Administration of the Government of the District of Columbia". This name is suggested because it is the only one which is not only descriptive of the Committee's work, but also is in accordance with the practice of other similar committees in other parts of the country.

2. The second of these is the question of the Committee's functions. It is suggested that the Committee should be authorized to study and report on the following matters:

(a) The organization of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.

(b) The personnel of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.

(c) The financial affairs of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.

(d) The public works of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.

(e) The public health of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.

(f) The public safety of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.

(g) The public education of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.

(h) The public recreation of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.

(i) The public housing of the District Government, including the various departments and agencies, and the manner in which they are organized and operated.
